MILDURA RESIDENT WELCOMES THE GREYWATER GATOR

Lower Murray Water (LMW) is very excited to announce that Mr Trevor Battye of Mildura has won a “Greywater Gator” in the **TurningWaterWise** competition.

“I use greywater as much as I can, and this wonderful device will make it so much easier for me to get water to all parts of my garden”, Mr Battye said.

Valued at over \$500 and kindly donated by Justwater Solutions, the Greywater Gator has a submersible pump fitted which enables water to be used from the Gator's 240 Litre storage area via a hose or sprinkler. Water can be captured from the washing machine, shower and bath etc and then reused on the garden.

Mr Battye entered Draw 2 of the **TurningWaterWise** competition by recording his water meter readings at the same time each week for six weeks, completing the entry form and submitting it to Lower Murray Water.

LMW's Managing Director, Ron Leamon said, “We are delighted the **TurningWaterWise** initiative has been embraced by the community. If we are all more aware of our household water use, we can find ways to reduce it; and make better use of this precious resource, such as using greywater on our gardens.” he said.

The first two draws of the **TurningWaterWise** competition have provided some great prizes including a dishwasher, two front loading washing machines, a Greywater Gator and minor prizes of Water Smart Packs. Two water efficient front load washing machines have been won by customers for Draw 2, Sharon French of Swan Hill and Robyn Bacon of Mildura. Both families are very happy with their prizes and look forward to saving water whilst using their new appliances.

Draw 3 has now commenced and LMW customers are reminded there is a range of ways to enter. Customers can record their meter readings at the same time once a week for six weeks and then complete and submit the entry form; or they can enter when purchasing selected water saving products from the competition partners Harvey Norman (Mildura and Swan Hill stores), Bunnings and Global Rotomoulding.

Customers may also enter through the **TurningWaterWise** Trigger nozzle exchange which is currently underway at all LMW offices. Customers have been participating very well with over 500 trigger nozzles exchanged to date.

The third draw will conclude on Friday 30th May. Further information about the prizes and entry details can be viewed at the website www.turningwaterwise.com.au, or by contacting your local LMW office.
